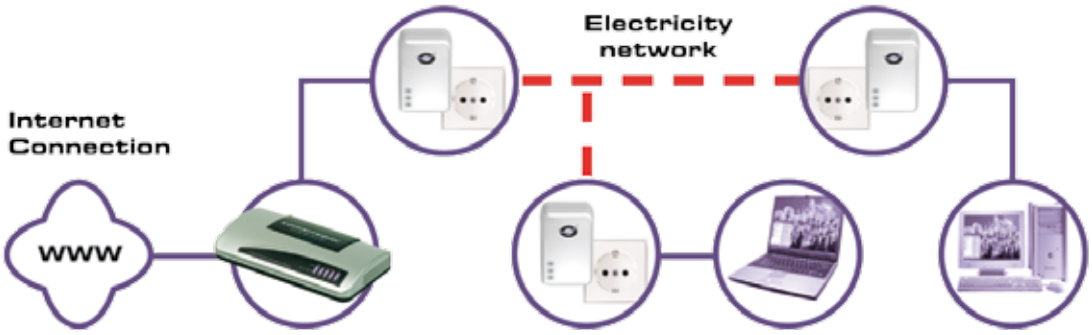
INFORMATION SHEET

1-2-3 POWERPLUG

NETWORKING

Expand your home network in 3 easy steps:



1 Connect the LAN cable (CAT5E) to the 1-2-3 Powerplug and your computer (or router)

2 Connect the 1-2-3- Power-plug to the wall outlet

3 Turn on your computer

Ready And your 200Mbps Power-plug home network is ready to surf the internet, share all your data/music/ videos etcetera !

THE EASIEST WAY TO SET-UP A 200 MBPS HOME NETWORK

With the Conceptronic 200Mbps 1-2-3 Powerplug you have the easiest solution to setup a fast home network. Just plug the CPNP200 into any power socket in your home and share your Internet connection, music, movies, files etc. There is no need for complicated software installation. The only cable you need is from a power outlet to your system.

You can start making your network in minutes!
